25. (New) The method of claim 1, further comprising combining the soil exposed to H<sub>2</sub> with soil not exposed to H<sub>2</sub>, and growing the plant in the thus combined soil, wherein the H<sub>2</sub> is generated by H<sub>2</sub> evolving microorganisms.

## REMARKS

Claims 1 to 25 are in the case. By the instant amendment, claim 9 has been amended to recite that "...the H<sub>2</sub> gas is generated by microorganisms selected for their ability to evolve H<sub>2</sub>". Support for this amendment can be found in the specification at, for example, page 9, lines 17 to 19, and page 9, lines 20 to 21. Also, claims 24 and 25 have been added. Claim 24 recites that the H<sub>2</sub> gas is generated by soil microorganisms, support for which can be found in the specification at, for example, page 2, lines 22 to 23. Claim 25 is based on original claims 2 and 9, and further defines the invention. No new matter has been entered.

Attached hereto is a marked-up version of the changes made to the specification and claims by the current amendment. The attached pages are captioned "Version with markings to show changes made".

### Fee Authorization
